

Term Calendar

As expected the Rippa Rugby, Cross Country and Gymnastics scheduled for this term events are all postponed unless we move to Alert Level 1 and crowds of over 100 are deemed to be safe. Kids can start cross country practise at home - imagine how good our runners will be if they start practising now! How about practicing 20 times around the outside of the house, or section fence-line, or here at school on fine days (in the Hall on wet days).

Birthdays

Belated birthday wishes to Hamazh who turned 7 on the 6th May.

Mr Kearney and senior students are doing a great job at social distancing.

Term 2 Week 4 2020

Welcome back everyone - thank you to the parents who have organised the return of the 10 Library books for each child and sent back loaned i-pads or laptops that were used over lockdown. It's also been great to see the workbooks the kids have used for their distance learning from the Ministry of Education. We'd like them all brought in to school and we'll safely store them in case of a second lockdown in the future (let's hope they are never needed)!

We also welcome Akshaya Chinthapalli (Y3) Akshaya and her family who have moved into Sanson. It's lovely to have another girl in the junior room. Thank you to Gabby and Kendra (our senior juniors) for being Akshaya's buddies as she settles in to Sanson School.

Drinks at school

Please make sure your child has a water filled drink bottle for the school day - our water cooler is NOT being used in Alert level 2!

School Hours during Alert Level 2

During Alert level 2 Sanson School is officially open from 9am-3pm for all students. Please do not send your children earlier than 8.30am and please arrange for their pick-up by 3.30pm.

(If there is any chance that you may not be able to keep to these hours please make special arrangements with us.)

Wetland

Our wetland has become a 'dryland' on the front field now that the leaky pipes are fixed - we will eventually need hundreds of trees to plant after the area is mown and maybe rotary hoed???

Any native plants gratefully received for planting next term - start growing now!

Mushrooms

A huge thank you to Phillipa, her daughter Annie and 2 pre-school grandkids that helped Mr K and I pick up 3 wheelie bins full of toxic mushrooms from the playground bark area. These lovely helpers then weeded the front gardens - we are soooooo impressed - thank you!

Please help us by warning your children not to touch or eat these mushrooms (or any food found on the grounds) just in case it is dangerous!
